MOOD:MIX USER GUIDE

If this is your first login, Mood Mix will show you a quick tutorial. Otherwise, you'll see the main Mix interface.

You'll notice a sidebar on the left portion of your screen. The following three main options are presented: **Now Playing**, **Mixes** and **Schedules**.

Clicking any of these options will change your view of the Mood Mix screen. The following is a short description of how each sidebar option functions.

Now Playing

The **Now Playing** view is your main view for Mood Mix. The large button is the “Play” button and will allow you to immediately play your current mix. Once the music is playing, the display bar will rotate between the Song Title, Artist and Album, and the progress bar will show you the remaining time.

The smaller button (at the right bottom of the Play button) is the “Skip” button. Using the Skip button, you may skip five songs every hour. To the right of the display bar, you will see a like/block button and to the right of the progress bar, you will see the mute button. There is also a Volume Level at the right, though we recommend you control your main volume using the volume control on your sound system.

The middle portion of the Now Playing tab features the Mix Board, which allows you to change how often a specific genre is played by moving the percentage slider up or down.

RECENTLY PLAYED	ARTIST	ALBUM	PROGRAM	LIKE/BLOCK
A New Day	Cindy Bradley	Unscripted	City Lights	♥ 🔒
Watching You Watch Him	Eric Hutchinson	Moving Up Living Down	The Cafe	♥ 🔒
Fire (original radio edit)	Dolce	Fire		♥ 🔒

MOOD:MIX USER GUIDE

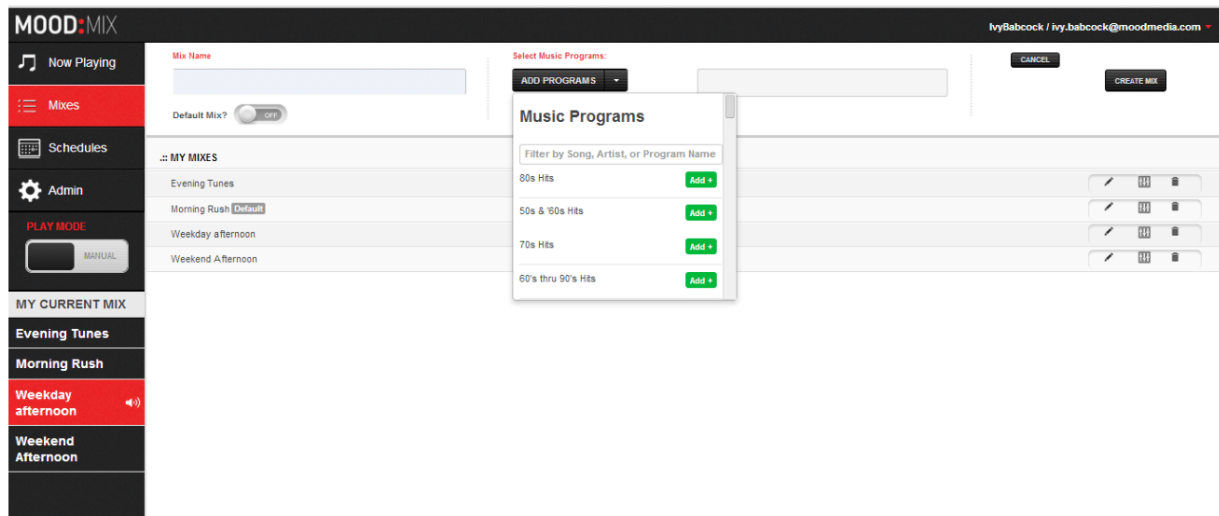

The bottom of the Now Playing tab features a list of Recently Played songs. You have the ability to click the "Like" button (the heart) or the "Block" button (the not allowed symbol). Liking a song will notify the software that similar songs should be played more often while Blocking a song will prevent it from being played again.

Mixes

The Mix tab is where you can create, modify, or delete your current mixes.

To create a mix, click the "+ New Mix" button in the top right corner. You can then name your new playlist. You also have the option to make this playlist your default mix. (Please note: There can only be one default mix at any given time.)

As you create any new mix, you may choose up to five Programs or Elements from 400+ options, all designed specifically for business by our professional Music Designers. You can also type in the name to search for a specific program. To listen to samples of any program, simply visit <http://www.moodmedia.com/samples-music.asp>.

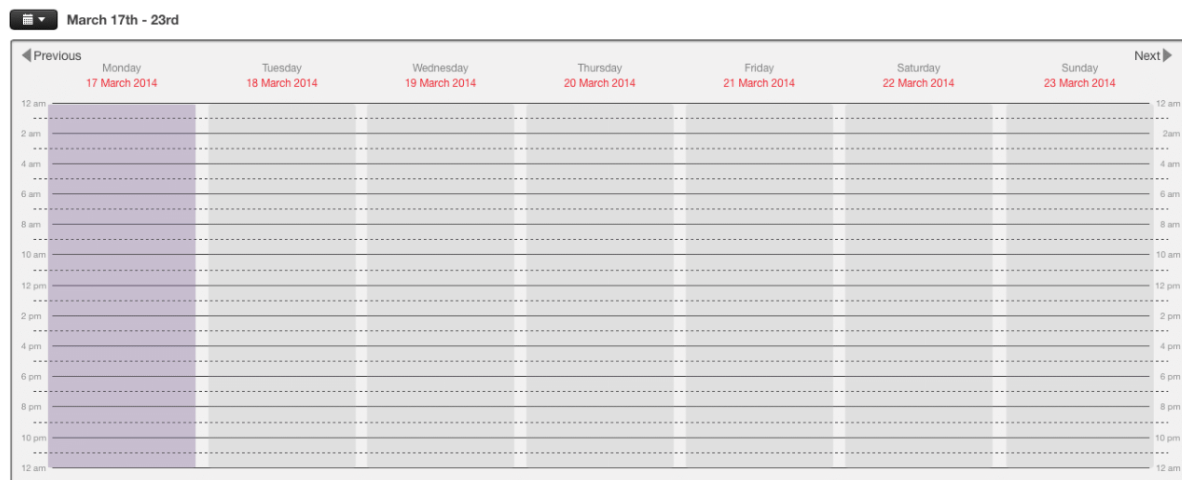

MIX NAME	CREATION DATE	
Happy Hour	03/17/2014	  
Rush Hour	03/17/2014	  
Sunday Brunch <small>Default</small>	03/10/2014	  
Tuesday BookClub	03/17/2014	  

All mixes associated with your account will be listed on the Mixes page. To the right of each mix, there is a tool bar allowing you to Edit the Mix, View the Mix Board (to change the sliders) and Delete the Mix.

Schedules

On the Schedules tab, you have the option to change the Play Mode from Manual (choosing a specific mix) to Schedule (choosing different mixes to automatically play at different times and days of the week).

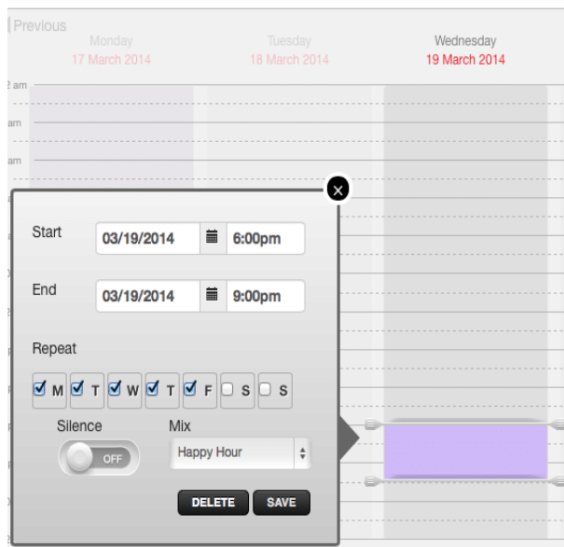

Once you have entered the Schedules area, you will see a weekly calendar view.

To schedule music to play during a particular time, simply click on any time during the week. A schedule box will appear. You will be able to refine/expand your day and time, choose the right mix and select any appropriate repetition frequency.

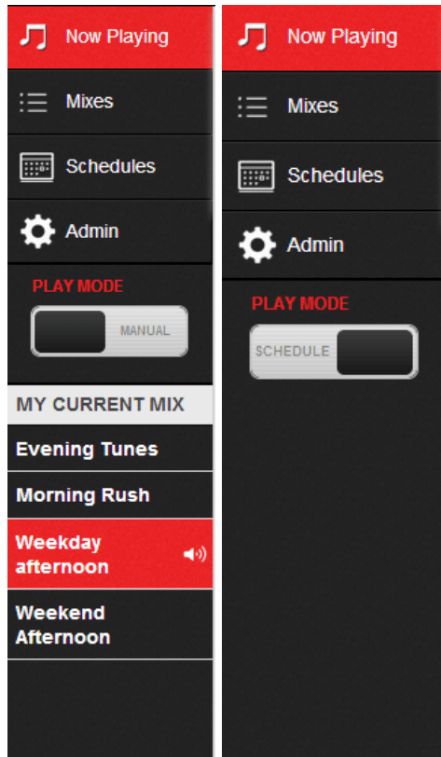

MOOD:MIX USER GUIDE

Clicking the calendar icon between the day and time brings up a monthly view so you can quickly navigate future dates as needed.

MOOD:MIX USER GUIDE

Mode Selection

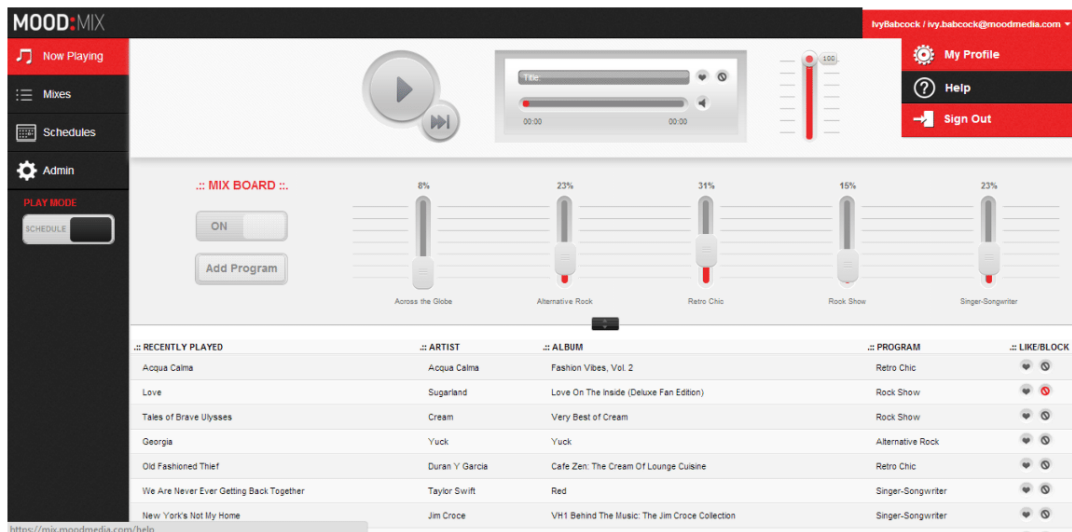

Below the three main tabs on the sidebar, you'll see a Left/Right choice button that displays "Manual" Mode (default) or "Schedule" Mode.

When Manual Mode is selected, you will see a list of your current mixes below the button. By clicking the name of the Playlist, you can switch between mixes.

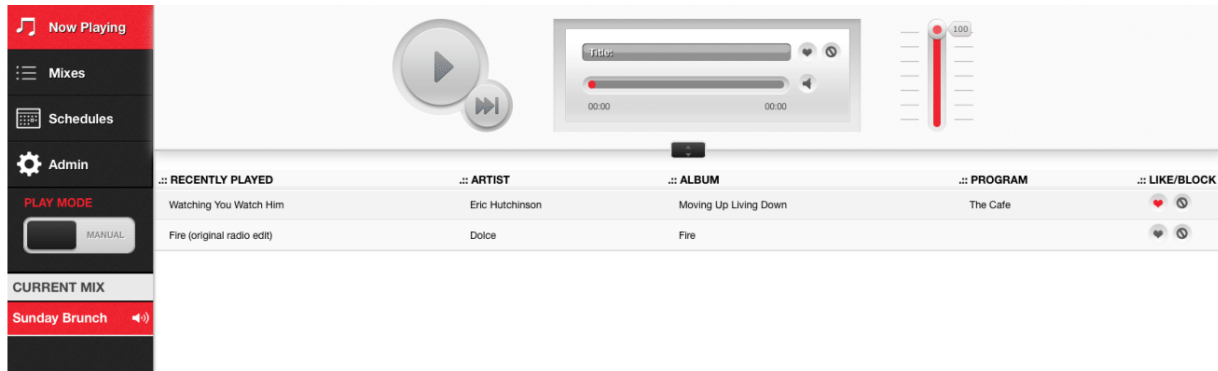

When Schedule Mode is selected, the option to select a mix from the sidebar is no longer available and Mood Mix simply runs according to the schedule(s) you have created in the Schedules tab.

Should you have any additional specific questions, please contact our Client Satisfaction team at (+27)11 780 3000 .

Administrator Options

Mood Mix also offers an Admin function that allows the Manager/Administrator of your account to create users and manage players. To enter Admin mode, the Account Administrator should simply click on the "Admin" tab below the three main navigation tabs on the left sidebar menu.

To create or manage users, simply click on the "Users" tab on the following screen.

Then + Add New User from the top right.

MOOD:MIX USER GUIDE

Add a first name, last name, email address, and create a password. Then Create User.

Create New User

leave blank if you don't want to change the password

* Confirm Password

Create User

This new user account will now appear on the Users list. Should you need to edit or delete this user, simply click on the "Edit" or "Delete" button that will be visible to the right of the user's listing.

If you have purchased Mood Mix for multiple locations, you will also be able to manage and update your locations using the Admin mode. To begin, select the "Players" tab on the left sidebar. One player will be listed for each purchased location with default names, Player 1, 2, 3...etc. To edit the name, assign a user or change the time zone for any player, click on the "Edit" box to the right of the player. You may update the name of the player or select an active user to manage the player or update the time zone. When your edits are complete, click on "Update Device."
